                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  US-08-973-137-14

Sequence 14, Application US/08973137

Sequence 14, Application US/08973137

Patent No. 6369208

GENERAL INFORMATION:

APPLICANT: BENSELER, FRITZ

APPLICANT: COLE, JAMES L.

TITLE OF INVENTION: CAPPED SYNTHETIC RNA, ANALOGS, AND APTAMERS

NUMBER OF SEQUENCES: 21

CORRESPONDENCE ADDRESS:

ADDRESSES: JOANNE M. GIESSER - MERCK & CO., INC.

STREET: 126 EAST LINCOLN AVENUE - P.O. BOX 2000

CITY: RAHWAY

STREET: N.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  ;

PATENT NO. 6472154
GENERAL INFORMATION:
APPLICANT: Garner, Harold R.
APPLICANT: Mina, John D.
TITLE OF INVENTION: Polymorphic Repeats in Human Genes
TITLE OF INVENTION: Polymorphic Repeats in Human Genes
TITLE REFERENCE: UTSD0667;
CURRENT APPLICATION NUMBER: US/09/475,947A
CURRENT FILING DATE: 1999-12-31
NUMBER OF SEQ ID NOS: 346
SOFTWARE: Patentin Ver. 2.1
SEQ ID NO 217
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Sequence 12, Application US/09136080E

Patent No. 6518017

GENERAL INFORMATION:

APPLICANT: Riley, Timothy A.

APPLICANT: Arnold, Lyle J.

TITLE OF INVENTION: COMBINATORIAL ANTISENSE LIBRARY
FILE REFERENCE: 0ASBIO.003A

CURRENT APPLICATION NUMBER: US/09/136,080E

CURRENT APPLICATION NUMBER: 1998-08-18

NUMBER OF SEQ ID NOS: 54

SOFTWARE: FastSEQ for Windows Version 3.0

LENGTH: 19

Sequence 58, Application US/08350260A

Patent No. 5962255

GENERAL INFORMATION:

APPLICANT: Winter, Gregory Paul

APPLICANT: Williams, Samuel Cameron

APPLICANT: Nissin, Ahuva

APPLICANT: Nissin, Ahuva

APPLICANT: Smith, Andrew John Hammond

TITLE OF INVENTION: Methods for producing members of specific

TITLE OF INVENTION: binding pairs

NUMBER OF SEQUENCES: 62

CORRESPONDENCE ADDRESS:

ADDRESSEE: David W. Clough

STREET: Marshall, O'Toole, Gerstein, Murray & Borun

STREET: Marshall, O'Toole, Gerstein, Wacker Drive
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            .
